

## **Department of Natural Resources & Conservation**

### **LAND BANKING REPORT**

#### **January 2019**

## **Background**

HB 223 (77-2-361 through 367, MCA) passed the Legislature in 2003 with bipartisan support, including unanimous support from the Land Board. HB 223 enacted a Land Banking program whereby the proceeds of trust land sales would be placed in a special land banking account which could only be used to acquire other real property interests (land, easements, or improvements). In 2009 the Legislature passed HB 402, removing the sunset and capping the number of acres that could be sold through Land Banking at 250,000).

## **Statute & Rule Requirements**

Statute limit the sale of land to 250,000 acres.

- Of these 250,000 acres, 75% must be isolated land.
- Limits sales to 20,000 acres until replacement properties were purchased.

Replacement land must generate as much or more revenue than the land sold.

The Department of Natural Resources & Conservation (DNRC) is required to provide a report to the Environmental Quality Council (EQC) prior to each regular legislative session which describes the results of the Land Banking program in detail.

Land Banking rules require a rigorous examination of state trust land prior to sale, including evaluation using the Montana Environmental Policy Act (MEPA) process, appraisal, notification of lessees, beneficiaries, adjacent landowners, licensees, and publication of legal notices, culminating in public auctions after which final State Land Board approval is required.

## **Goals and Accomplishments of the Program**

Three goals of the program include increasing public access to state trust land through strategic sales and acquisitions, improving the investment portfolio of the beneficiaries by diversifying land holdings and enhancing management and stewardship activities with land consolidation. To date, DNRC has accomplished:

- Isolated sales make up 73% of all acreage sold since the Land Banking program's inception in 2003, while all 98,228 acres purchased through the program are legally accessible for the Department and the public.
- Lands sold have generated \$619,929 annually, while lands acquired have generated \$843,498 annually. This annual income has increased trust revenues \$223,569, or approximately 36% over income generated from parcels sold.
- Lands sold are low-producing, predominantly isolated grazing lands, and the lands acquired include commercial, agricultural, grazing, and timbered lands with layered income potential.
- Acquisitions are contiguous and, in most cases, result in consolidating existing state ownership.

## Land Banking by the Numbers

LAND SALES			
<b>\$59,532,595</b> total generated from land banking sales through the Land Banking program	<b>\$4,932,450</b> total generated from land banking sales in 2018	<b>58,902 or 73%</b> of the acres sold since 2003 have been inaccessible	<b>642.25</b> total acres sold in 2018
<b>437</b> parcels sold and auction since 2006	<b>\$7.73</b> average income per acre of sold parcels	<b>72</b> total cabin & home sites sold since 2015 	
ACQUISITIONS			
<b>98,228</b> total acres acquired since 2006 	<b>\$843,498</b> generated annually from parcels acquired	<b>23</b> parcels acquired since 2006	
<b>\$8.61</b> average income per acre for all acquisitions	<b>\$15.04</b> average annual income per acre of acquired parcels from annual lease payments	<b>98,228</b> acres of publicly accessible land acquired 	
<b>2.62%</b> average rate of return on acquired parcels with annual lease payments	<b>2.21%</b> Projected long-term average rate of return on forested acquisitions	<b>\$543</b> average cost per acre for all acquisitions

## Land Acquired through the Land Banking Program 2006-2018

This table summarizes replacement property acquired with Land Banking proceeds. Each acquisition is evaluated on set criteria. Properties must:

- increase the rate of return compared with the land sold;
- improve access and consolidate land holdings;
- maintain a similar land base consistent with the state's fiduciary duty; and
- consider equalization of land base through sales and acquisitions by geographic area.

It is important to note that while 80,165 acres were sold generating \$59,532,595 in sales revenue, the state spent only \$53,328,091 to acquire 98,228 acres. Additionally, the replacement acreage is all publicly accessible and produces more than twice the rate of return to the school trust land beneficiaries.

TRACT NAME	COUNTY	ACRES	PURCHASE PRICE	APPRAISED VALUE	2018 NET INCOME	2018 RATE OF RETURN	PURCHASE DATE

\* Rate of Return only reflects secondary income from grazing. Timber will be harvested from the property during the next 60 years. The projected range of Rate of Return for timberland over a 60-year period is 0.96% to 2.13%.

\*\* Net Income based on actual ag & grazing income for 2018. 2019 will have 3004 more acreage in production (2018 had a contract in place which allowed previous owner to harvest existing winter wheat crop).

# Acquisition Profile: ANGELA FARM

In February 2018, the Land Board gave final approval for DRNC to acquire the 17,000-acre Angela Farm Rosebud County north of Miles City for \$11,300,000. The purchase was made possible through DNRC's Land Banking program, which enables the department to "bank" funds from the sale of small trust land parcels generally without legal public access and low rates of return. Purchased with funds accrued from 65 sales, the Angela Farm acquisition provided new farming opportunities to half a dozen younger families in the area. In the first year of state ownership, leases on Angela Farm generated more than \$400,000 for the Common School trust while providing excellent public access for recreation and quality hunting. DNRC is committed to improving public access and increasing revenue streams from Montana's 5 million acres of trust lands, which generated a combined \$41.9 million in distributable revenues for K-12 schools in 2018.

## Acquisition Profile: STILLWATER-LAZY CREEK

DNRC completed a 3-phase Stillwater-Lazy Creek land acquisition and donation in the fall of 2018. Several partners including Trust for Public Lands, Weyerhaeuser, Montana FWP, USFS, USFWS, DNRC, and BPA all collaborated to fund, purchase, and block up the Stillwater State Forest. This block includes 13,398 acres of prime forest that provides year-round public access and recreation, holds exceptional and diverse wildlife habitat, and will allow future sustainable timber management opportunities for the state's forest management program. This project was made possible through DNRC's Land Banking Program.
